

**TOWN OF DAVIE
TOWN COUNCIL AGENDA REPORT**

TO: Mayor and Councilmembers

FROM/PHONE: David Quigley, AICP, Planning and Zoning Manager/(954) 797-1103

PREPARED BY: David Abramson, Deputy Planning and Zoning Manager

SUBJECT: Site Plan

AFFECTED DISTRICT: 4

ITEM REQUEST: Schedule for Council Meeting

TITLE OF AGENDA ITEM: MSP 11-5-09, Water and Water Reclamation Facility, 7351 SW 30th Street, Regional Activity Center Educational District (RAC-ED) Site Plan Committee recommended approval subject to the planning report and 1) to increase the number of trees on the west property line and southeast corner; 2) to supply the elevations for the FP&L utility building which should be similar in character to the other buildings on the site; 3) to be concerned with energy and water use within the building itself; 4) to consider removing the berm in the center of the site; and 5) note that there was a concern about the longevity of the wire on the green screen which should last for a ten- to- fifteen-year period.

REPORT IN BRIEF: This request is for a new six (6) million gallon per day water treatment facility, a 3.5 million gallon per day water reclamation facility, and an administrative building. The architecture of the buildings reflect a contemporary design with tilt-up concrete panels arranged in symmetrical patterns to create a dimensional effect and provide articulation. Also proposed is a pocket park, composed of a plaza area, a fountain, an art wall, an information kiosk, and a series of elliptical planters. Access to the water and water reclamation facility is through a proposed driveway located off Southwest 30th Street. The facility can be considered compatible with both existing and allowable uses and properties Southwest 30th Street. *Full size copies of the plans will be provided to Town Council separately.

PREVIOUS ACTIONS: n/a

CONCURRENCES: At the March 9, 2010 Site Plan Committee meeting, Mr. Evans made a motion, seconded by Mr. Breslau, to approve subject to the planning report and 1) to increase the number of trees on the west property line and southeast corner; 2) to

supply the elevations for the FP&L utility building which should be similar in character to the other buildings on the site; 3) to be concerned with energy and water use within the building itself; 4) to consider removing the berm in the center of the site; and 5) note that there was a concern about the longevity of the wire on the green screen which should last for a ten- to- fifteen-year period. In a roll call vote, the vote was as follows: Chair Venis – yes; Vice-Chair Lee – absent; Mr. Breslau – yes; Mr. Engel – yes; Mr. Evans – yes. **(Motion carried 4-0)**

FISCAL IMPACT: not applicable

Has request been budgeted? n/a

RECOMMENDATION(S): Other - Staff finds the application complete and suitable for transmittal to Town Council for further consideration.

TOWN OF DAVIE
Planning & Zoning Division
Staff Report and Recommendation

Applicant Information

Owner

Name: Town of Davie
Address: 6591 Orange Drive
City: Davie, Florida 33314
Phone: (954) 797-1030

Petitioner

Name: Brian Stitt
Address: 13450 W. Sunrise Blvd., Suite 200
City: Sunrise, Florida 33323
Phone: (954) 745-7200

Background Information

Application Request: Master Site Plan for a new Water and Water Reclamation Facility

Address: 7351 SW 30th Street

Location: Generally located on SW 30th Street between College Avenue and SW 73rd Avenue

Future Land Use Plan Map: Regional Activity Center

Existing Zoning: Regional Activity Center Educational District (RAC-ED)

Additionally, the south boundary of the plat is intersected by SW 30th Street which is considered a Transit Oriented Street.

Properties fronting on Transit Oriented Streets have regulations that pertain to use and site development standards, such regulations control over the corresponding zoning district. This concept applies to the first six hundred feet of lot depth.

Existing Use: Vacant (Previously University of Florida experimental tree nursery)

Parcel Size:	14.049 gross acres (611,976 sq. ft.)
Proposed Use(s):	Municipal Water and Water Reclamation Facility
Proposed Density:	n/a

		<u>Surrounding Land</u>

East:	Davie Regional Activity Center Educational District (RAC-ED).			
West:	RM-10, Medium Dwelling District			

Zoning History

Related zoning history:

On September 17, 1997, the Town of Davie Council approved the Regional Activity Center Future Land Use Classification for the area including the subject site.

On February 6, 2008, the Town of Davie adopted zoning and other land development regulations as part of the implementation of the Regional Activity Center Future Land Use Designation. Consequently; as a result, the subject site was rezoned from CF, Community Facility District to RAC-ED, Davie Regional Activity Center Educational District.

Concurrent Request(s) on same property:

Plat application (P 11-1-09), the petitioner requests approval of the proposed boundary plat known as “Davie Community Facilities V” plat.

Applicable Codes and Ordinances

The effective Code of Ordinances governing this project is the Town of Davie Land Development Code.

Land Development Code, Division 3. Site Plan Requirements and Procedures.

Land Development Code, Division 1. Sec. 12-32.502. The Regional Activity Center land development regulations and design standards are intended to implement the adopted master plan.

Comprehensive Plan Considerations

Planning Area:

The subject property falls within Planning Area 8. This Planning area includes land located south of Nova Drive and north of Griffin Road, and west of the Florida Turnpike and east of University Drive. This planning Area is the heart of Davie, and is the most diverse, characterized by older, small scale commercial development, older single family residential neighborhoods, and newer, large scale multi-family residential developments that serve the rapidly growing South Florida Education Center (SFEC). The SFEC includes Nova Southeastern University, Florida Atlantic University, Broward Community College, Florida International University, McFather Vocational School, among others. The planning area also encompasses the downtown Davie Business District.

Broward County Land Use Plan:

The subject site falls within Flexibility Zone 99.

Applicable Goals, Objectives & Policies:

Future Land Use Plan, Policy 5-2: The (re)zoning, (re)planning, and site planning of land shall be in compliance with the density ranges shown on the Davie Future Land Use Plan map and the applicable Future Land Use Designation provisions as contained in the Permitted Use portion of the Implementation Section.

Future Land Use Element, Policy 17-1: Lands designated for non-residential use shall be located in a manner, which facilitates development, but does not adversely impact existing and designated residential areas.

Future Land Use Plan, Policy 17-3: Each development proposal shall be reviewed with respect to its compatibility with adjacent existing and planned uses.

Application Details

The petitioner's submission indicates the following:

1. *Site:* The proposed site is approximately 14 gross acres in size including the section of SW 30th Street that runs through the site. An 80 foot Right of Way for SW 30th Street is being dedicated as a public street by way of the plat. The site plan depicts a six (6) million gallons per day (MGD) water treatment facility, a 3.5 (MGD) water reclamation facility, and an administrative building with ancillary uses such as parking areas, open space/retention areas, and a dumpster enclosure. The Water Treatment Facility is a Low Pressure Reverse Osmosis (LPRO) Plant that will be constructed and upgraded in three phases as follows: 6MGD at Phase I (2012), 10MGD at Phase II (2015), and 12MGD at Phase III (2023). The Water Reclamation Facility is a Membrane Bioreactor (MBR) with UV disinfection that will also be constructed and upgraded in phases as follows: 3.5MGD at Phase I (2012) and 7MGD at Phase II (2020). The Water Reclamation Facility will provide up to 2MGD of reclaimed water for irrigation purposes in the adjacent university campuses and golf courses while reducing the use of potable water consumption. The balance of the reclaimed water will be disposed of via two deep injection wells to be located on the site.
2. *Architecture:* The character of the building reflects a contemporary design with clean horizontal lines. The tilt-up concrete panels include vertical elements arranged in symmetrical patterns to create a tri-dimensional effect and to provide articulation. The following colors are used to accent previously described symmetrical patterns: Earthenware, Hawkeye, Beechwood, and Sandstone. In regards to the building silhouette, the overall roof is predominantly flat. However, greater height and hip roofs are used to emphasize building entry and corners. The concrete tile roof will be hurricane resistant of high profile shape, Type I, Spanish or "S" and of Terra Cotta color.

3. *Access and Parking:* The main access to the water and water reclamation facility is through a proposed driveway located off SW 30th Street. The site has a secured, electrically operated sliding gate and one personnel electrically operated door at the south end of the property. Surveillance and control of the gates will be monitored via closed circuit camera and controlled by Utilities department staff. A perimeter road is to provide direct access to the water treatment facility, the water reclamation facility, and the administrative office. The site has a proposed parking capacity of thirty-two (32) spaces. Fourteen (14) parking spaces provide a direct access to the water reclamation facility headworks, and the remaining eighteen (18) spaces provide direct access to the water treatment plant and administration building. The site plan meets the Land Development Code parking requirements.
4. *Lighting:* The lighting design meets the minimum illumination standards of the Land Development night sky regulations.
5. *Signage:* Signage is not part of this master site plan application. All signs shall meet code prior to the issuance of a building permit.
6. *Landscaping:* The landscape plan indicates Live Oak, Verawood, Gumbo Limbo, Bald Cypress, and Red Tip Cocoplum are proposed along the perimeter of the site. Landscaping along right-of-way adjacent to the subject site is explained in more detail in the pocket park description. The subject site was known as the Institute of Food and Agricultural Science Nursery Block. The site has a substantial amount of trees that cannot be replaced, so the applicant has agreed to pay a \$56, 226.11 tree replacement cost into the Town tree preservation trust fund. In this agreement, the Town has retained the right to retrieve existing trees that may be useful for relocation to off site properties under the Tree Preservation Ordinance and at the Town's expense.
7. *Pocket Park:* The pocket park is composed of a plaza area, a fountain, an art wall, an information kiosk, and a series of elliptical planters. As described by the applicant, the plaza area is immediately connected to the public walk as a draw from the street and provides access to the water feature and flanking gardens. The design plan of the plaza and the planter areas are formed in wide and graceful concrete bands as a durable solution to provide access and contain root growth that might otherwise disrupt a paved surface. The plaza brick is a 3 color blend to compliment the gray of the concrete with a tan and red to add an earthy tone while effectively concealing stains that would appear in a non-blended color scheme. The fountain feature has a low profile so that the vertical heavy water jets draw attention without obscuring view to the art wall feature. The pond has a standard 18" deep pool depth conforming to safe standards and includes a low seat wall in the foreground for safe controlled access to the water. The art wall feature is a tri-dimensional non-rusting aluminum metal sculpture suspended off the wall face intending to have a subtle shadow affect. It too is a silver-gray powder coated finish feature with contrasting dark green tree graphic, pure white bird patterns and medium green palm frond shapes. The background in-fill elements are metal screen materials that combined with the solid

tubular pipe framing creates open portions, semi-shaded portions and contrasting solid pattern portions. The Art Wall is flanked by a series of elliptical planter openings, two of which represent local native Cypress domes tightly planted and include native understory trees and shrub cover. A Sabal Palm grove and its appropriate understory planting create a third planter island, and these are separated by the native Paurotis Palm accent group that completes the background habitat that exists in our native wetland resource garden. The information kiosk will be constructed from the same materials as the art wall and include a solid backed cabinet that has a lexan plastic cover plate to protect an educational and information graphic to be developed at a later date. All site furniture has a color blend to all the surrounding metal work. A lighter color chosen to avoid overheating in the Florida sun. All site amenities are anchored into the sturdy concrete bands as a secure mounting method and as a unified design standard. Site furniture will all be of a matching brand and complimentary patterns.

8. *Drainage:* The Central Broward Water Control District (CBWCD) has granted the Town a 5ft Variance for installation of underground storage systems; trees and fence encroachment in the N-7 canal maintenance easement (see attached CBWCD minutes).
9. *Trails:* The Roberts Potters park trail is located along SW 30th Street south to the subject site. This trail will accommodate leisure activities to and from the subject site and will also provide access numerous Davie parks and other trails.

10. *Local Concurrency:* As required in the Land Development Code, Section 12-323, Adopted Level of Services, building permits shall not be obtained unless there is sufficient available capacity to sustain the level of service for Potable Water, Sanitary Sewer, Transportation, Drainage System, Solid Waste, Recreation, Police, and Fire.

11. *Compatibility:* The proposed water and water reclamation facility can be considered compatible with both existing and allowable uses and properties along SW 30th Street.

Design Variations

Section 12-32.523 of the Regional Activity Center Code allows the Town Council to approve design variations where it can be shown that the design goals cannot reasonably be achieved in a given situation. Staff recommends approval of the following design variations:

Section 12-32.515 (2) of the RAC code provides that decorative fencing is the only type of fencing permitted in any front yard. Decorative fencing shall not exceed three (3) feet in height. Approved decorative fencing materials are wooden shadowbox, picket fencing, and decorative steel, iron and aluminum. This is intended to ensure an appropriate, pedestrian-friendly transition from the public sidewalk to the private property. ***Design Variation: allow the current owner to build an 8' high decorative security fence along the front side of the property so the site will be in compliance with Federal Homeland Security regulations.***

Section 12-32.508 (A)(2)(d) of the RAC code requires that sidewalk width along Transit-Oriented Streets as prescribed by the applicable cross-sections, with comfortable seating and lighting is provided at the moment of development (see SW 30th Street Section Attached). This is to secure that a pedestrian-friendly and seamless multimodal transportation community is progressively built. ***Design Variation: allow the SW 30th Street's south sidewalk, as prescribed by the corresponding section, to be built at the time SW 30th Street improvements are done.***

Table 12-32.510 (C) of the RAC code provides that: front street building placement or minimum setback in a Transit Oriented Street is 0 feet, the minimum percentage of lot width occupied by a building in a Transit Oriented Street is 100%, and the minimum interior side building setback is 0 feet. Table 12-32.509 (E) of the RAC code requires a minimum of two stories is required for Transit Oriented Streets. Also, Section 12-32.511 (B) of the RAC code requires that all buildings on lots with Transit-Oriented Street frontage shall have their principal frontage (i.e. main entrance and architectural orientation) along such street. These development standards are to provide a sense of enclosure to the street corridor and to contribute to pedestrian activity on the streets which correspondingly will contribute to the viability of retail and service establishments. ***Design Variation: allow the administration building to be located in the middle of the site, between the proposed Water Treatment and Water Reclamation Facility; to ensure that the plant operators can safely work when extreme weather conditions occur.***

Section 12-205 (A)(3)(d)(1)(b) of the Land Development Code access dimension guidelines provides that a two-way driveway must have at minimum twenty-five (25) feet of width. Table 12-205 requires a minimum twenty-four (24) feet width aisle for parking angled at angle of ninety degrees. These access dimension guidelines are to assure that movements between the public right-of-way and the parking stall are conducted in an efficient and orderly form. ***Design Variation: allow a two-way driveway with twenty (20) feet of width, so sufficient space available to accommodate a new canal maintenance easement; required by Central Broward Water Control District.***

Significant Development Review Agency Comments

The following comments represent significant comments made by the Development Review Committee as part of the review process. All comments have been addressed unless otherwise indicated.

Planning and Zoning Division:

The applicant has agreed to address the following comments prior to final site plan approval:

General Comments

1. Staff requests that fence on the north side of the property be moved out of the existing forty-five (45') feet drainage easement.
2. Staff requests that graphic quality for tabular data is improved, so numbers are easier to read.
3. Staff requests that the Roberts Potter Park trail location is added to site plan information.
4. Staff requests that concrete tile use in the roof manufacturer, reference and color is provided in the elevations.
5. Staff requests that building height be measured as the mean height level between eaves and ridge gables on hip and gambrel roofs.
6. Staff request that a statement indicating that luminaries B and C are full cutoff fixtures is added into the photometric plan

Code Related Comments

1. As per § 12-32.514 (B)(12), solid walls should not exceed twenty (20) feet in length without vertical articulation.
2. As per § 12-32.521 (A)(3), curbed interior landscape islands 12 feet wide and the length of the parking stall are required for every 10 stalls in alternating rows of parking spaces, or equivalent configuration approved by the town, and shall each contain one large shade tree.
3. As per § 12-261 (B)(3), developer shall be required to install street lights with a maintained minimum of one-half (0.5) foot-candle of light measured at grade level. The maximum to minimum foot-candle level shall not exceed a twelve to one (12:1) ratio and the average to minimum foot-candle level shall not exceed a four to one (4:1) ratio.

Standing Comments

1. As per § 12-32.525.(D)(8), appropriate light levels and pleasant accent effects may be achieved through the use of landscape lighting.

Public Participation

The public participation process provides the ability for citizens of the Town of Davie to actively participate in the Town's development procedures. The petitioner conducted meetings with the public at the Town Council Chambers on December 1, 2009 and December 8, 2009. Attached is the petitioner's Citizen Participation Report.

Staff Analysis

The petitioner's site design meets the intent of the RAC-ED, Regional Activity Center Educational District. The proposed site plan is consistent with the Land Development Code as it relates to access, location, size, and use. The proposed water and water reclamation facility will be compatible with both the Comprehensive Plan and the Future Land Use Plan Map designation of Regional Activity Center.

Findings of Fact

Staff finds that the site plan complies with the general purpose of the proposed the RAC–ED, Regional Activity Center Educational District. Furthermore, the site plan is in conformance with all applicable Codes and Ordinances in terms of site design, circulation, setbacks, and parking requirements. The proposed site plan can be considered compatible with surrounding development.

Staff Recommendation

Staff finds the application complete and suitable for transmittal to the Site Plan Committee and Town Council for further consideration.

Site Plan Committee Recommendation

At the March 9, 2010 Site Plan Committee meeting, Mr. Evans made a motion, seconded by Mr. Breslau, to approve subject to the planning report and 1) to increase the number of trees on the west property line and southeast corner; 2) to supply the elevations for the FP&L utility building which should be similar in character to the other buildings on the site; 3) to be concerned with energy and water use within the building itself; 4) to consider removing the berm in the center of the site; and 5) note that there was a concern about the longevity of the wire on the green screen which should last for a ten- to-fifteen-year period. In a roll call vote, the vote was as follows: Chair Venis – yes; Vice-Chair Lee – absent; Mr. Breslau – yes; Mr. Engel – yes; Mr. Evans – yes. **(Motion carried 4-0)**

Public Participation and Citizen Participation Policies

DIVISION 7. PUBLIC PARTICIPATION

Sec. 12-319.5 Purpose and intent.

The public participation process provides for the ability of citizens of the Town of Davie to actively participate in the town's development procedures and will allow the town's citizens to play an essential role in shaping the direction of the town's development, thereby enhancing the welfare of the community.

(Ord. No. 2004-031, § 1, 10-6-04)

Sec. 12-319.6. Application and requirements.

All applicants submitting applications to the town for approval of a site plan, grant of a special permit, rezoning or land use plan amendment shall prepare and execute a plan for citizen participation. Citizen participation plans shall be submitted to the town's development service department and approved by the planning and zoning manager or an appropriate designee prior to its execution by the applicant. The applicant shall thereafter implement the citizen participation plan at least (7) seven days prior to the development review committee's review of the application and shall submit to the development services department a written report setting forth the results of the citizen participation plan procedures at least ten (10) days prior to the first public hearing on the item.

(Ord. No. 2004-031, § 1, 10-6-04)

Sec. 12-319.7. Requirements.

(A) Citizen participation plan. All citizen participation plans shall include:

(1) A list of residents and/or property owners, interested parties, and public agencies that may be affected by the application (affected parties). The names and addresses of residents and property owners within the public hearing notice area, as set forth in the Davie Code of Ordinances, shall be provided to applicant by an appropriate planning representative. The planning representative shall also provide the applicant with all names of any other interested parties and/or public agencies who have stated an interest in the application.

(2) A summary of how the applicant proposes that it will notify all "affected parties" of the application.

(3) A summary of the proposed application.

(4) A description of the manner in which the applicant proposes that it will disseminate information to residents, property owners and/or interested parties.

(5) A schedule of events planned by the applicant to complete the citizen-participation procedure. Applicant shall be required to conduct a minimum of two (2) public meetings with "affected parties". This requirement may be waived if letters from all adjacent affected parties state that all their items have been addressed and there is no need for another meeting with the applicant.

(6) A requirement that the applicant shall keep the development services department informed of the status of its citizen participation efforts by coordination its efforts through the assigned project planner.

(Ord. No. 2004-031, § 1, 10-6-04)

Sec. 12-319.8. [Citizen participation report.]

(A) Citizen participation report. All citizen participation reports shall include:

- (1) A written summary of the results of the citizen participation effort prior to the first public meeting in which the application is heard.
 - (2) Dates and locations of all meetings where citizens were invited to discuss the applicant's proposal.
 - (3) The names, dates, addresses, and number of people that participated in the process.
 - (4) A written summary of the issues and/or concerns raised by residents and how the applicant proposes to resolve these issues and/or concerns. If the applicant is unable or unwilling to resolve the issues, the summary should state the reason why these issues cannot be resolved.
 - (5) The report shall be reviewed by the planning and zoning staff to determine whether the applicant has completed the citizen participation process prior to its transmittal by staff to either the site plan committee, planning and zoning board, or local planning agency.
- (Ord. No. 2004-031, § 1, 10-6-04)

Sec. 12-319.9. Applicability.

The applicant's citizen participation report shall be included within the item's background material packet and any issues raised by interested parties within the report, pertinent to any provision of the Town Code of Ordinances which may affect the town council's determination of the application may be taken into consideration by the town council as part of its deliberations. The submitted citizen participation plan shall be considered as one more piece of information to assist town council in their decision making.

(Ord. No. 2004-031, § 1, 10-6-04)

Sec. 12-319.10. Reserved.

Editor's note: Ord. No. 2004-031, § 1, adopted Oct. 6, 2004, repealed § 12-319.10 in its entirety. Formerly said section pertained to exemptions.

CITIZEN PARTICIPATION POLICIES

The following citizen participation policies are encouraged by the Town of Davie and Planning Staff when fulfilling code requirements:

- The applicant should provide a copy of the notice letter to staff for review prior to mailing.¹
- The applicant should include a brief description of the project with maps or plans attached to the notice letter.
- The applicant should print on each envelop the following statement "Public Participation Notification/Time Sensitive Information Enclosed" (*Refer to the example below*)
- The applicant should conduct the meetings within close proximity to the project site.
- The applicant should use a public facility to hold the meeting whenever possible.
- The applicant should conduct the meetings around one week apart from each other.
- The applicant should provide at least one-week notice before meeting dates.
- The applicant should hold the meetings after 5 p.m.
- The applicant should not schedule the meetings on holidays.

Re: Citizen Participation Plan Meeting for: Town of Davie Water & Wastewater System Expansion
Project Number: SP 11-5-09

Dear Staff:

As required by Davie Ordinance No. 2004-31, we (AECOM Water) are enclosing a copy with a copy of the proposed citizen participation plan for the Town of Davie Water & Wastewater System Expansion. In addition, to the outline of the plan, we are enclosing the following material.

1. A list of residents and/or property owners, interested parties, and public agencies that may be affected by the application.
2. A summary of how AECOM proposes that it will notify all "affected parties" of the application.
3. A summary of the proposed application.
4. A description of the manner in which AECOM proposes that it will disseminate information to residents, property owners and/or interested parties.
5. A schedule of events planned by AECOM to complete the citizen-participation procedure.
6. A requirement that AECOM keep the Development Services Department informed on the status of its citizen participation efforts by coordinating its efforts through the assigned project planner.

The information above should satisfy the requirements of the public participation and the application review process.

Sincerely,

Brian Stitt

Citizen Participation Proposed Plan

**TOWN OF DAVIE WATER & WASTEWATER SYSTEM EXPANSION
CITIZEN PARTICIPATION PLAN
PROJECT DESCRIPTION
(Project Number: SP 11-5-09)**

Project Description

In an effort to improve water quality and the water delivery system to its residents and constituents, The Town of Davie is expanding and upgrading its water and wastewater reclamation system. The Town of Davie Water and Wastewater System Upgrade project consists of the design and construction of a new Water Treatment and Water Reclamation Facility. The Water Treatment Facility will be a carefully designed, secure, odor controlled site with low level lighting located at 7351 SW 30th Street, Davie, Florida, close to Nova Southeastern University and the University of Florida.

The reclaimed water will be utilized for irrigation purposes in the adjacent university campuses and the golf course, while reducing the use of potable water consumption. The project will be completed in three phases and the projected completion date is

**TOWN OF DAVIE WATER & WASTEWATER SYSTEM EXPANSION
CITIZEN PARTICIPATION PLAN
NOTIFICATION PROCEDURE**

As required by the Town of Davie; the Residents and/or Property Owners and Interested Parties will be notified of the Citizen Participation Meetings for the **Town of Davie Water & Wastewater System Expansion** *Project Number: SP 11-5-09* as follows:

- The applicant (AECOM Water) will send out Public Participation meeting notices for both meetings via regular US Mail at least one week prior to each of the two participation meetings

	1st Citizen Participation Meeting	2nd Citizen Participation Meeting
Date	December 1, 2009	December 8, 2009
Time	6:00 pm - 8:00 pm	7:00 pm - 9:00 pm
Location	Davie Town Hall 6591 Orange Drive Davie, FL 33314 Town Council Chambers	Davie Town Hall 6591 Orange Drive Davie, FL 33314 Town Council Chambers

(The list of residents and/or property owners, interested parties and public agencies that may be affected by the application was provided by the Town of Davie, Planning and Zoning Division)

**TOWN OF DAVIE WATER & WASTEWATER SYSTEM EXPANSION
CITIZEN PARTICIPATION PLAN
DISSEMINATION OF INFORMATION**

After identifying location/date/time for public meetings, the information will be disseminated as follows:

- Meeting Notice was created with a description of the project, a location, date, and time for the Public Participation Meetings.
- Meeting Notices will be sent out via regular US Mail November 24th, 2009 for the Public Participation Meetings with location maps attached.
(The list of residents and/or property owners, interested parties and public agencies that may be affected by the application was provided by the Town of Davie, Planning and Zoning Division)
- Scheduled First Citizen Participation Meeting December 1st, 2009
 - Planned presentation
 - Questions and Answers session to follow
- Scheduled Second Citizen Participation Meeting December 8th, 2009
 - Planned presentation
 - Questions and Answers session to follow
- Sign-In sheets will be distributed and collected at both meetings
- Meeting minutes will be taken and a Summary of Discussion will be provided for both meetings
- Final Report

**TOWN OF DAVIE WATER & WASTEWATER SYSTEM EXPANSION

MEETING NOTICE

November 20th, 2009

**Re: Citizen Participation Meeting for: Town of Davie Water & Wastewater System Expansion
Project Number: SP 11-5-09**

Dear Neighbor:

This letter is to invite you to a citizen participation meeting relating to the Town of Davie Water & Wastewater System Expansion for a parcel located at 7351 SW 30th Street, Davie, Florida.

In an effort to improve water quality and the water delivery system for its residents and constituents, The Town of Davie is expanding and upgrading its water and wastewater reclamation system. The Town of Davie Water and Wastewater System Upgrade project consists of the design and construction of a new Water Treatment and Water Reclamation Facility. The Facility will be a carefully designed, secure, odor controlled site with low level lighting located at 7351 SW 30th Street, Davie, Florida, close to Nova Southeastern University and the University of Florida. The reclaimed water will be utilized for irrigation purposes in the adjacent university campuses and golf course, while reducing the use of potable water consumption. The project will initiate in the fall of 2010 and is scheduled to be completed in the fall of 2012.

Under a Town of Davie Ordinance, AECOM Water (the petitioner) is required to hold two (2) citizen participation meetings and send notice to all property owners within 1,000 feet of the subject site prior to the Town initiating their review of the application. We have scheduled the following meetings:

	1st Citizen Participation Meeting	2nd Citizen Participation Meeting
Date	December 1, 2009	December 8, 2009
Time	6:00 pm - 8:00 pm	7:00 pm – 9:00 pm
Location	Davie Town Hall 6591 Orange Drive Davie, FL 33314 Town Council Chambers	Davie Town Hall 6591 Orange Drive Davie, FL 33314 Town Council Chambers

If you wish to submit written comments, please send them to:

Mr. Bruce Taylor, Utilities Director
TOWN OF DAVIE
6591 Orange Drive
Davie, FL 33314

Also, please be advised that there will be additional opportunities for public input at the Town of Davie Public Hearings.

Sincerely,

Bruce Taylor
Utilities Director

Summary of the Discussion at Public Participation Meeting I

**TOWN OF DAVIE WATER & WASTEWATER SYSTEM EXPANSION
CITIZEN PARTICIPATION PLAN
SUMMARY OF DISCUSSION
AT PUBLIC PARTICIPATION MEETING I
December 1st, 2009**

Meeting began: 6:00 p.m.

Meeting adjourned: 7:30 p.m.

The Citizen Participation Plan Meeting for the Town of Davie Water & Wastewater System Expansion Project began at 6:00 p.m. Only one (1) Davie property owner was present. The following questions were raised:

- **Q:** How will this project affect the traffic flow?
A: Traffic will be affected minimally. No roads will be closed.
- **Q:** How will the noise affect residents?
 - a) From the drilling?
A: There will be some echo while cutting through the rock. The drilling will not be done late at night.
 - b) From the wells?
A: The noise from the wells will not be excessive. The wells are electric powered instead of diesel.

AECOM PowerPoint presentation was given as required. There being no further questions or concerns, the meeting was adjourned at 7:30 p.m.

Re: Citizen Participation Plan Meetings for: Town of Davie Water & Wastewater System Expansion
Project Number: SP 11-5-09

Dear Staff:

Please be advised that as required by the Town of Davie, Land Development Code, Chapter 12, Division 7, AECOM Water advertised and notified all the property owners surrounding the subject property within 1,000 feet to invite them to, two (2) Public Participation Meetings, located at the Davie Town Hall, 6591 Orange Drive, Davie, FL 33314, on December 1, 2009, from 6:00 pm - 8:00 pm, and on December 8, 2009, from 7:00 pm - 9:00 pm. The above scheduled meetings were held. The following is a summary of the key issues brought up by Town of Davie property owners:

The first Citizen Participation Plan Meeting for the Town of Davie Water & Wastewater System Expansion Project began at 6:00 p.m. Only one (1) Davie property owner was present. The following questions were raised:

- **Q:** How will this project affect the traffic flow?
A: Traffic will be affected minimally. No roads will be closed.
- **Q:** How will the noise affect residents?
 - a) From the drilling?
A: There will be some echo while cutting through the rock. The drilling will not be done late at night.
 - b) From the wells?
A: The noise from the wells will not be excessive. The wells are electric powered instead of diesel.

AECOM PowerPoint presentation was given as required. There being no further questions or concerns, the meeting was adjourned at 7:30 p.m.

The second Citizen Participation Plan Meeting for the Town of Davie Water & Wastewater System Expansion Project began at 7:00 p.m. AECOM PowerPoint presentation was shown, no new issues were raised; the meeting was adjourned at 7:50 p.m.

AECOM Water hopes the above information fulfilled requirements of Public Participation Ordinance as it pertains to **Project Number: SP 11-5-09.**

Sincerely,

A handwritten signature in black ink, appearing to read 'Brian Stitt', with a long, sweeping horizontal line extending to the right.

2. PLEDGE OF ALLEGIANCE

3. EMERGENCY MATTERS

4. ANNOUNCEMENTS/PRESENTATIONS

5. CITIZENS' CONCERNS

Ms. Ruth Wolff, 13320 SW 66 Street, Sunshine Ranches, stated she was there speaking for herself as well as people who called her when they couldn't talk to Mr. Falletta. The concerns they had were the conditions that their canals were in. There was a lot of rubbish all over. She rode her bike and she really could see how bad they were. They were concerned about why something couldn't be done to clean a lot of this out of their canal system and make them more beautiful.

Mr. Donzella inquired if Mr. Crowley would comment on that seeing as how that was his district.

Mr. Crowley stated he would be glad to meet with Ms. Wolff and she could point out some of the areas of concern. He was not aware of any major problems. He knew the staff had been working for the last two weeks on removing dead fish within the canal system District wide, but if there was an area of concern, he would be glad to meet with Ms. Wolff.

Ms. Wolff thanked the Board and Mr. Crowley.

C.B.W.C.D.

6. DISTRICT ENGINEER REPORT

6.A. Consent Agenda

6.A.1. Charter School of Cooper City – Plat

6.A.2. Chick Fil-A – P&D

6.A.3. BHA and Geopak Headquarters – As-Built

6.A.4. Monterra Cascade – P&D

6.A.5. Davie Community Facilities – Plat

ACTION: Mr. Biederman moved to approve the consent agenda. Mr. Donzella seconded the motion. In a voice vote, all voted in favor. (Motion carried 6-0)

6.B. Regular Agenda

6.B.1. Davie Water and Reclamation Facility – Variance Request

Mr. Hart stated this was a 14 acre site in the Town of Davie west of College Avenue. It was directly adjacent to the UF IFAS project that was approved last year by the Board. The applicant had submitted a request for variance. This was in advance of their formal submittal for paving and drainage approval. They recognized that they would require a certain number of variances and they wanted to present those to the Board in advance of the paving and drainage so that they could have a consideration before they moved forward with that formal submittal.

Mr. Hart stated they were requesting three variances at this time. The first variance they were requesting was for a 5 foot encroachment into the District's 20 foot canal maintenance easement. The plat was on the consent agenda that was just approved and as part of that plat they had dedicated an additional 12 feet along the District's N-7 canal for maintenance. Within that 12 feet that was just dedicated they were looking to encroach with certain improvements, mainly a fence and landscaping.

Mr. Hart stated the second variance was requesting a waiver to dedicate easements within the site on their water management areas.

Mr. Hart stated the final request was for a variance to allow for underground storage as part of their water management system. Mr. Hart stated for the Board's information on the last request for the underground storage he did want to mention that they were proposing under their conceptual drainage a combination of water management systems within the site that would include dry retention areas, an underground exfiltration trench, and the use of the underground storage systems. They had demonstrated that the portion that they were using for the underground storage they were providing 150 percent of that storage. Mr. Hart stated the applicant was there to discuss the variances.

Mr. Brian Caletka, Town of Davie, stated he was there that night as the Mayor couldn't make it and the Vice-Mayor was at his other job so he was there to ask for the Board's approval of the three variances. The first was in order to be in compliance with the

C.B.W.C.D.

Department of Homeland Security, since it was a public utility they had to have a fence around it. They required that it was not a self created variance. Also as a courtesy to the community to the west they were going to put up trees and shrubs. Typically the District had approved these in the past if they had 15 feet of clear area for maintenance and the Town was actually providing them with 17 feet.

Mr. Caletka stated the second one was for underground storage of the water instead of having the above ground ponds. This was very similar to what was utilized for the Miami Dolphins training facility right across the street. It seemed to be a great success and the Town wanted to duplicate the success.

Mr. Caletka stated the third one was the utility line was encroaching into the site retention easements and it was just because it was a treatment facility and had lots of pipes. The great thing was it was going to be in full compliance with the South Florida Water Management District.

Mr. Caletka stated he was there that night with a consultant as well as the Town Administrator and Marcie Nolan.

Mr. Terry McCaghren, Derosé Design Consultants, stated he wanted to discuss the reasons and the way the variances came about from their point of view and how they, as engineers, had solved the problems.

Mr. McCaghren showed photographs of the existing canal and stated all of the overgrowth that they saw all along the existing canal bank was adjacent to the site. As they could see, there was absolutely no way any maintenance could be performed on this canal bank. It was very irregularly shaped, it dropped straight off, etc. Mr. McCaghren stated their solution was to redo the canal banks clearing off of the vegetation totally. They were replacing it with native vegetation and providing a 17 foot wide flat area all the way down. They could get to it from 30 Street and go north all the way to the fire academy. There was a 5 foot encroachment for the fence that was required by Homeland Security, some shrubs and trees that they needed for buffering to keep the Sun Forest people happy and to keep the Town of Davie happy for their code requirements.

Mr. McCaghren stated he was the one that did the presentations several years ago for the Miami Dolphins training facility. Things had changed a little bit and they had upgraded to provide a little more up to date design criteria interconnecting the chambers a little bit differently and adding more isolator rows. Mr. McCaghren stated there was a question of what these things looked like and passed around samples. Mr. McCaghren stated they were very modular. They went together easily but they stayed fastened. They assembled them in rows surrounded by rock. It was not totally different than the typical exfiltration trench of an effect. It was a much wider bed. There were a lot more open areas so they got a lot more storage. Because they had holes in them they did get exfiltration out of them and sharing of the stormwater from row to row. Mr. McCaghren stated their solution was to provide as much on site retention or dry detention areas as they could. Water quality was in drain fields. The balance to meet design criteria was in the Stormtech beds. They did do

C.B.W.C.D.

in and put in 150 percent of the requirement to follow the District criteria. Mr. McCaghren stated he would be there to answer any questions at the end of their presentation.

Ms. Marcie Nolan stated she was an attorney representing AECOM, which was the design build engineering firm that had been hired by the Town of Davie to design and build the Town's new water/ wastewater reclamation facility. Ms. Nolan stated she was going to briefly go over the District's criteria for review for a variance. As they knew, the District had four stated criteria that must be met in order for the Board to approve a variance. The first one was that there were special conditions and circumstances, not the result of the applicant, that affected the overall design of the site. The Town was building an essential public facility. This was to provide drinking water, waste water, and re-use water to the Town's utility customers. As an essential public facility it was governed by the Federal Homeland Security Act in addition to a whole host of other regulations that covered it. For example, they had additional federal regulations, state regulations, South Florida Water Management District regulations, as well as the Town of Davie's regulations and Central Broward's criteria. Ms. Nolan stated all of these overlapped and affected the overall design of the site. SFWMD required a water re-use component as part of the overall site design. This was a very good thing and the Town of Davie was very excited to be able to provide water re-use, but it did consume about a quarter of the site that otherwise would be left in an open area. The perimeter fence was also governed by the federal regulations for Homeland Security. The landscape buffer was a Town of Davie requirement, but it also provided buffering for the residential uses to the west of the site and that was being a good neighbor. In designing the site to be compatible with the surrounding uses, for example, this was the Town of Davie's redevelopment area. Across the street was Nova Southeastern University. There were about four brand new buildings in the last ten years that had gone up that were beautiful. The architecture was definitely something different from the Town's previous architecture and it did make a statement. On College and SW 30 FAU and Broward Community College had built a brand new parking garage. Just to the north of that on the west side of college was the joint center between FAU and the University of Florida that was under construction now. Ms. Nolan stated this area was the redevelopment heart of the Town of Davie and the South Florida Educational Center. Keeping that in mind the Town strove to design a project that would be compatible with the surrounding area. In designing the site to be compatible vaulted storage became necessary due to most of the treatment process was being housed inside one main structure and the facility itself required tremendous underground infrastructure to connect the various treatment and distribution system. This request was also the minimum request that would make possible the reasonable use of the land for the Town of Davie's water and wastewater facility. The Town was still providing 17 feet of clear area for maintenance along the N-7 canal. She knew that if it was anything less than 15 this Board would not be very happy so the Town worked very closely with Mr. Hart and Mr. Crowley to make sure that it was in excess of 15 feet. The Town would also be regarding the canal, removing all the invasive, non-native species and stabilizing the bank. The vaulted storage would be constructed of Stormtech, which was a known and proven engineering solution. The District had approved this in other redevelopment sites as well as when the area had been under the control and maintenance of a governmental entity. The Town was providing on site retention in addition to this vaulted storage. Ms. Nolan

C.B.W.C.D.

stated the last criteria was that without these two variances the strict application of the criteria would deprive the Town of reasonable use of the land for a water and a water reclamation facility. The fence would have to be placed east of the roadway and cause internal operational issues including access and safety. Without the vaulted storage the site could not be designed as one seamless project and overall plant efficiency would be affected. What was most important to note that in their staff report that evening staff did find that these variance requests did not cause any problems to the overall functioning of the stormwater retention system that was the focus for Central Broward's review. Ms. Nolan stated in conclusion, the granting of this request was in harmony with the District's criteria and would not result in any impact upon the integrity of the stormwater and drainage system of the site or of the surrounding communities. They did have Mr. Shimun, the Town Administrator, there tonight to have concluding remarks and then they were all there to answer any questions.

Mr. Gary Shimun, Town Administrator for the Town of Davie, stated he wanted to point out that this was a municipally owned facility. They would take good care of it. They were going to be around for a long time. The District would not be giving this to a private entity that they didn't know what would happen to in 10 or 15 years. They were not asking for exemptions to anything; they were only asking for 3 variances, which had been explained to the Board and that they felt did not have a major impact on the District's operations whatsoever. Mr. Shimun stated in conclusion, they were just looking for some inter-governmental cooperation much as they extended to the District when they were putting up their facility. To him it was just the way governments worked together and in this specific instance they were helping the entire community by providing something that without it there would be no more growth. At this point they would be happy to answer any questions the Board might have.

Mr. Bell stated he noticed that in the easements that were going to be dedicated to the District there were a number of facilities that were going to be encroaching in there and his understanding was that there was no problem with an indemnification agreement from the Town to the District.

Mr. Shimun stated they would be happy to do any indemnification that was necessary for the project.

Mr. Bell stated also there was a statutory issue as far as whether or not a governmental entity could indemnify anybody and he had always put in there to extent allowed by law, provided by law. He thought if that statement was in there, it would satisfy everybody.

Mr. Donzella stated he had spoken with Ms. Nolan last week and inquired if she was able to get any other information on some of the information that he wanted.

Ms. Nolan stated yes. She was going to turn it over to Brian Stitt who was the engineer responsible for the design of the facility.

Mr. Brian Stitt, AECOM Water, was present to answer Mr. Donzella's questions.

C.B.W.C.D.

Mr. Donzella stated he had some concerns about the purpose of the site and the N-7 canal that ran adjacent to the wastewater plant. He was concerned that if there was a major failure of any of the structures that contained the wastewater, if there were any retention systems unique to the structure that would contain any spill.

Mr. Stitt stated the main structures that were going to be containing the raw wastewater were going to be constructed out of reinforced concrete. They were not going to be steel tankage. In those types of situations it was very unlikely that there would be a major rupture of the tankage. They didn't anticipate that being a problem. There was no secondary retention, per se, for the wastewater. It was just being constructed within concrete tanks, which were typically very strong and didn't have catastrophic failures.

Mr. Donzella inquired how the code that established the construction of that tank fared with regards to hurricane ratings and what not.

Mr. Stitt stated the tankage for that structure would be constructed well in excess of the requirements for hurricane ratings so they wouldn't anticipate that there would be any failure of that structure as a result of hurricanes.

Mr. Donzella inquired if any of the underground piping systems that would be carrying the wastewater were adjacent to the underground storage that they were asking the Board to approve that evening.

Mr. McCaghren stated a facility of this type would have lots of pipes. There would be a large, probably 24 inch force main coming into the site, which would be carrying the raw wastewater from all parts of the north part of town into this site. They had held standard separation. The wastewater piping was all iron piping that would be pressure tested for in excess of 150 PSI. There would probably be instances where it was within 10 feet or so of a Stormtech underground system. Mr. McCaghren stated he didn't know from an engineering point of view of any problem. If you had a break, you shut it down and fixed it. Obviously, they could control any off site discharge if there was a break until it was cleaned up and then open it back up, but they did not anticipate these lines fracturing.

Mr. Donzella stated it was just from a standpoint of potential ground water contamination.

Mr. McCaghren stated they followed all of the state and local EPD, health department, and DDP guidelines for separation for these types of facilities.

Mr. Flynt inquired if that material was a petroleum product.

Mr. McCaghren stated it was a plastic of some kind, yes.

Mr. Flynt inquired if they knew the life span on that.

Mr. McCaghren stated they knew of no reason that it wouldn't last well over 50 years. He didn't know if they have had their product as it existed today, and it was an approved product, but he didn't know if there were any of that particular nature that had been in

C.B.W.C.D.

service for that long. He could tell them, it hadn't been that long, but the predecessor to that was a system that was known as the infiltrator system. It wasn't quite as strong and it didn't have the maintenance characteristics that this did with the isolator rows, inspection ports, and all of those nice little ways that they kept the siltation from getting into the other units. He knew of those that had been around for 15 years or so and there was no problem. He had had no failures with the system and they also have had no pavement failures, which was important, because it was all about installation, the sub-grades, and what they did on top of it. Mr. McCaghren stated the Stormtech people would tell them it was the best thing since sliced bread. He actually thought it was. He would like to use it for all of his drainage solutions; he was that high on it. Unfortunately, it was not economically feasible for a lot of people. It was a relatively expensive solution.

Mr. Fardelmann inquired what was located on that property now.

Mr. McCaghren stated there were a bunch of trees. The University of Florida had a nursery out there with trees that they were doing experiments on.

Mr. Fardelmann stated they used the term redevelopment and in the past the District's policy was that they only considered this type of storage on redevelopment. He admitted that it was not in the criteria, but that had been their policy. Mr. Fardelmann stated maybe Mr. McCaghren could explain how it fit the category of redevelopment.

Mr. McCaghren stated he would let one of the representatives from Davie answer that, but the RAC was pretty much a total redevelopment area and this was part of the Davie RAC. As far as he knew there had never been a structure there.

Mr. Fardelmann stated he would just like to point out to the Board that had been their policy, that they didn't consider these except in redevelopment cases. If they were going to change their policy, he thought they needed to address it.

Mr. Shimun stated they would just reiterate that this entire area was redevelopment. It was used by the University for growing plants and things like that, but the fact of the matter was it had been developed and had been worked over before. There was no soil on this part of the town that hadn't been turned over by somebody prior to this time. In their view it was all redevelopment.

Mr. Fardelmann stated the idea was that this system, when they were talking about an existing shopping center or something that had so few options left that they were willing to do something like this to improve the drainage. It was well worth considering at that point, but if they had the option of starting with vacant land they didn't need to pave it over, they could think of more natural solutions. Mr. Fardelmann stated in his opinion that was why they had the policy.

Mr. Shimun stated he understood. They wanted to stay with this site, though, because of specifically the location. It was going to be very close to their end users. If they had to move to another site, they would be a year or more back out, plus millions of dollars

C.B.W.C.D.

more into the project. Mr. Shimun stated once again, they were just asking for a little cooperation from the Board and they were only asking for very simple variances.

Mr. Fardelmann stated the other two he didn't have much of a problem with, but he thought they were going against their policy and obviously they were opening the door for what they had tried to avoid, that this type of system just got used everywhere and they would end up with no green area left.

Mr. Rayson stated he would just point out again that the granting or not of any variance was not precedence for any other variance.

Mr. Bell stated he looked at this canal and it looked like it was less than five feet in depth. Mr. Bell inquired if there was any necessity or need to have that canal reworked in such a way to deepen it, or if that was sufficient for the District's needs.

Mr. Hart stated the total width of the canal did meet their typical canal section. He had not had any discussions with the applicant or the Manager about having the canal deepened or excavated at this point. As discussed, they were requiring the canal bank to be cleared, regraded, and restabilized.

Mr. Bell inquired if that was just on the east side.

Mr. Hart stated yes; along the property of the Davie site.

Mr. Bell inquired if Mr. Crowley had seen any issues with this canal as far as being able to maintain it or excessive aquatic growth, which was a problem.

Mr. Crowley stated actually, it was probably the widest section of the N-7 canal system. Mr. Crowley stated he just wanted to point out that the applicant was there for the variances only and would be back for the paving and drainage plans. They could discuss any improvements within that system then.

Mr. McCaghren stated he would like to address one of Mr. Fardelmann's comments. This site was not paved over with asphalt. They were over 48 percent green with the development they had. The reason for the Stormtech was more for the 100 year floodplain encroachment; not for water quality and those other things. Actually 68 percent of their storage requirements were met in open dry detention areas.

Mr. Fardelmann inquired if Mr. McCaghren was involved in the previous negotiations with the District that they went through; if he was involved in the meetings. Mr. Fardelmann inquired if this subject came up, if it was mentioned that they didn't usually consider this for new development.

Mr. Crowley stated he knew he had talked to Mr. Fardelmann briefly about his concerns with it. They had heard concerns from this commission about these storm tanks only in redevelopment areas, but it was not written in the District's criteria so they still had the right to apply for it. As Mr. Shimun mentioned, this facility was going to service a redevelopment area so they could look at it from different views. Adjacent to it was

C.B.W.C.D.

going to be all redevelopment and this utility was going to serve the redevelopment area so even though the ground it was on was not being redeveloped, it was going to serve a redevelopment project within the RAC. Mr. Crowley stated they could visit their criteria and have workshops.

Mr. Fardelmann stated it looked like a great project and there was a lot of open area for a facility like that.

Mr. Biederman inquired what was going on top of the Stormtech system, if it was going to be a parking lot, if it was going to be grass.

Mr. McCaghren stated no, they very rarely put them in grass areas, because when they did they lost available soil storage underneath the grass. It was underneath the pavement.

Mr. Bell inquired of Mr. Crowley, just to put it on the record, if that 17 foot area which was going to be left over for the canal maintenance easement was sufficient area for the District to clean up the canal or do whatever they needed to along there.

Mr. Crowley stated yes.

Mr. Fardelmann inquired if they could do a normal maintenance agreement.

Mr. Crowley stated this project would be subject to the typical maintenance agreement and also subject to the five year renewal. Mr. Crowley stated there were some conditions prior with this type of system. They went to a two year renewal instead of a five year renewal, because they were still not too familiar with this. They only really had one project that had the system in place, which was the Miami Dolphins training facility. It was working fine. It was coming up on its renewal in the next six months. Mr. Crowley stated the Board could put some conditions on it.

Mr. Hart stated he would just point out it was also put in out at Western High School and they just did renew theirs.

Mr. Bell stated he just noticed on the plat that it looked like there was only one canal maintenance easement being dedicated to the District, which would be along the west side of the property. The plat referenced the canal maintenance easements, plural; they ought to change that to singular.

ACTION: Mr. Biederman made a motion to grant the variance to waive the requirement for easements. Mr. Flynt seconded the motion.

Mr. Donzella inquired if they should not go in order of the variance requests, that being number two.

Mr. Biederman stated OK, he was just picking the one he was comfortable with making a motion for.

C.B.W.C.D.

In a voice vote, all voted in favor. (Motion carried 6-0)

ACTION: Mr. Donzella moved to approve encroachment into the District's 20 foot canal maintenance easement. Mr. Flynt seconded the motion. In a voice vote, all voted in favor. (Motion carried 6-0)

ACTION: Mr. Flynt moved to approve the underground storage system. Mr. Donzella seconded the motion for discussion.

Mr. Fardelmann stated he would just like to add the caveats that they still did not have a lot of history on this type of system. He thought it was a very good idea that they put it on, since they had a little history, maybe a three year permitting process. Mr. Fardelmann inquired if they also hadn't required a little higher bond on this too, or if it was the fact that they went with 150 percent of what covered that issue.

Mr. Crowley stated he didn't recall, but whatever conditions the Board wanted.

Mr. Fardelmann stated also just the statement that as Mr. Rayson said, there was no precedent being set by this and he would like to revisit getting this in the criteria so everybody was more aware of what their intent was on these. Davie shouldn't be penalized by the fact that the District didn't have it in the criteria.

Mr. Donzella inquired if Mr. Fardelmann wanted the motion to contain the three year permit renewal.

Mr. Hart stated the criteria already did require a three year bond. It actually said the stormwater management permit shall be renewed annually up to the three years.

Mr. Crowley stated they had special conditions on the underground storage.

Mr. Donzella stated he didn't have a problem with having that part of the motion.

Mr. Biederman stated it was mentioned that there was not a whole lot of history, but what better test site than another government agency. That was why he would be for it.

In a voice vote, all voted in favor. (Motion carried 6-0)

7. DISTRICT ATTORNEY'S REPORT

7.A. Local Bill Relating to Ad Valorem Taxation

Ms. Lori Parrish, Broward County Property Appraiser, stated she sent them some information. She thought her office had answered the questions as to what was increased or decreased for homesteaded properties, non-homesteaded properties, and commercial. Ms. Parrish stated she no longer had a concern with this issue. In fact, she owed all of them an apology. Her staff had spent the better part of 72 business hours explaining to her why the state law said exemptions on ad valorem assessments. They hadn't done that but the Ad. Then the Board had brought up that they didn't
